

WHEN DISASTER STRIKES

AT&T NETWORK DISASTER RECOVERY (NDR)

AT&T's commitment to our customers doesn't stop when a natural or a man-made disaster occurs. The mission of the Network Disaster Recovery (NDR) Team is to recover AT&T voice and data service network elements to an area affected by a disaster.

THE NUMBERS:

 **95** TECHNOLOGY RECOVERY SEMI TRAILERS

 **200** ADDITIONAL NDR EQUIPMENT PIECES

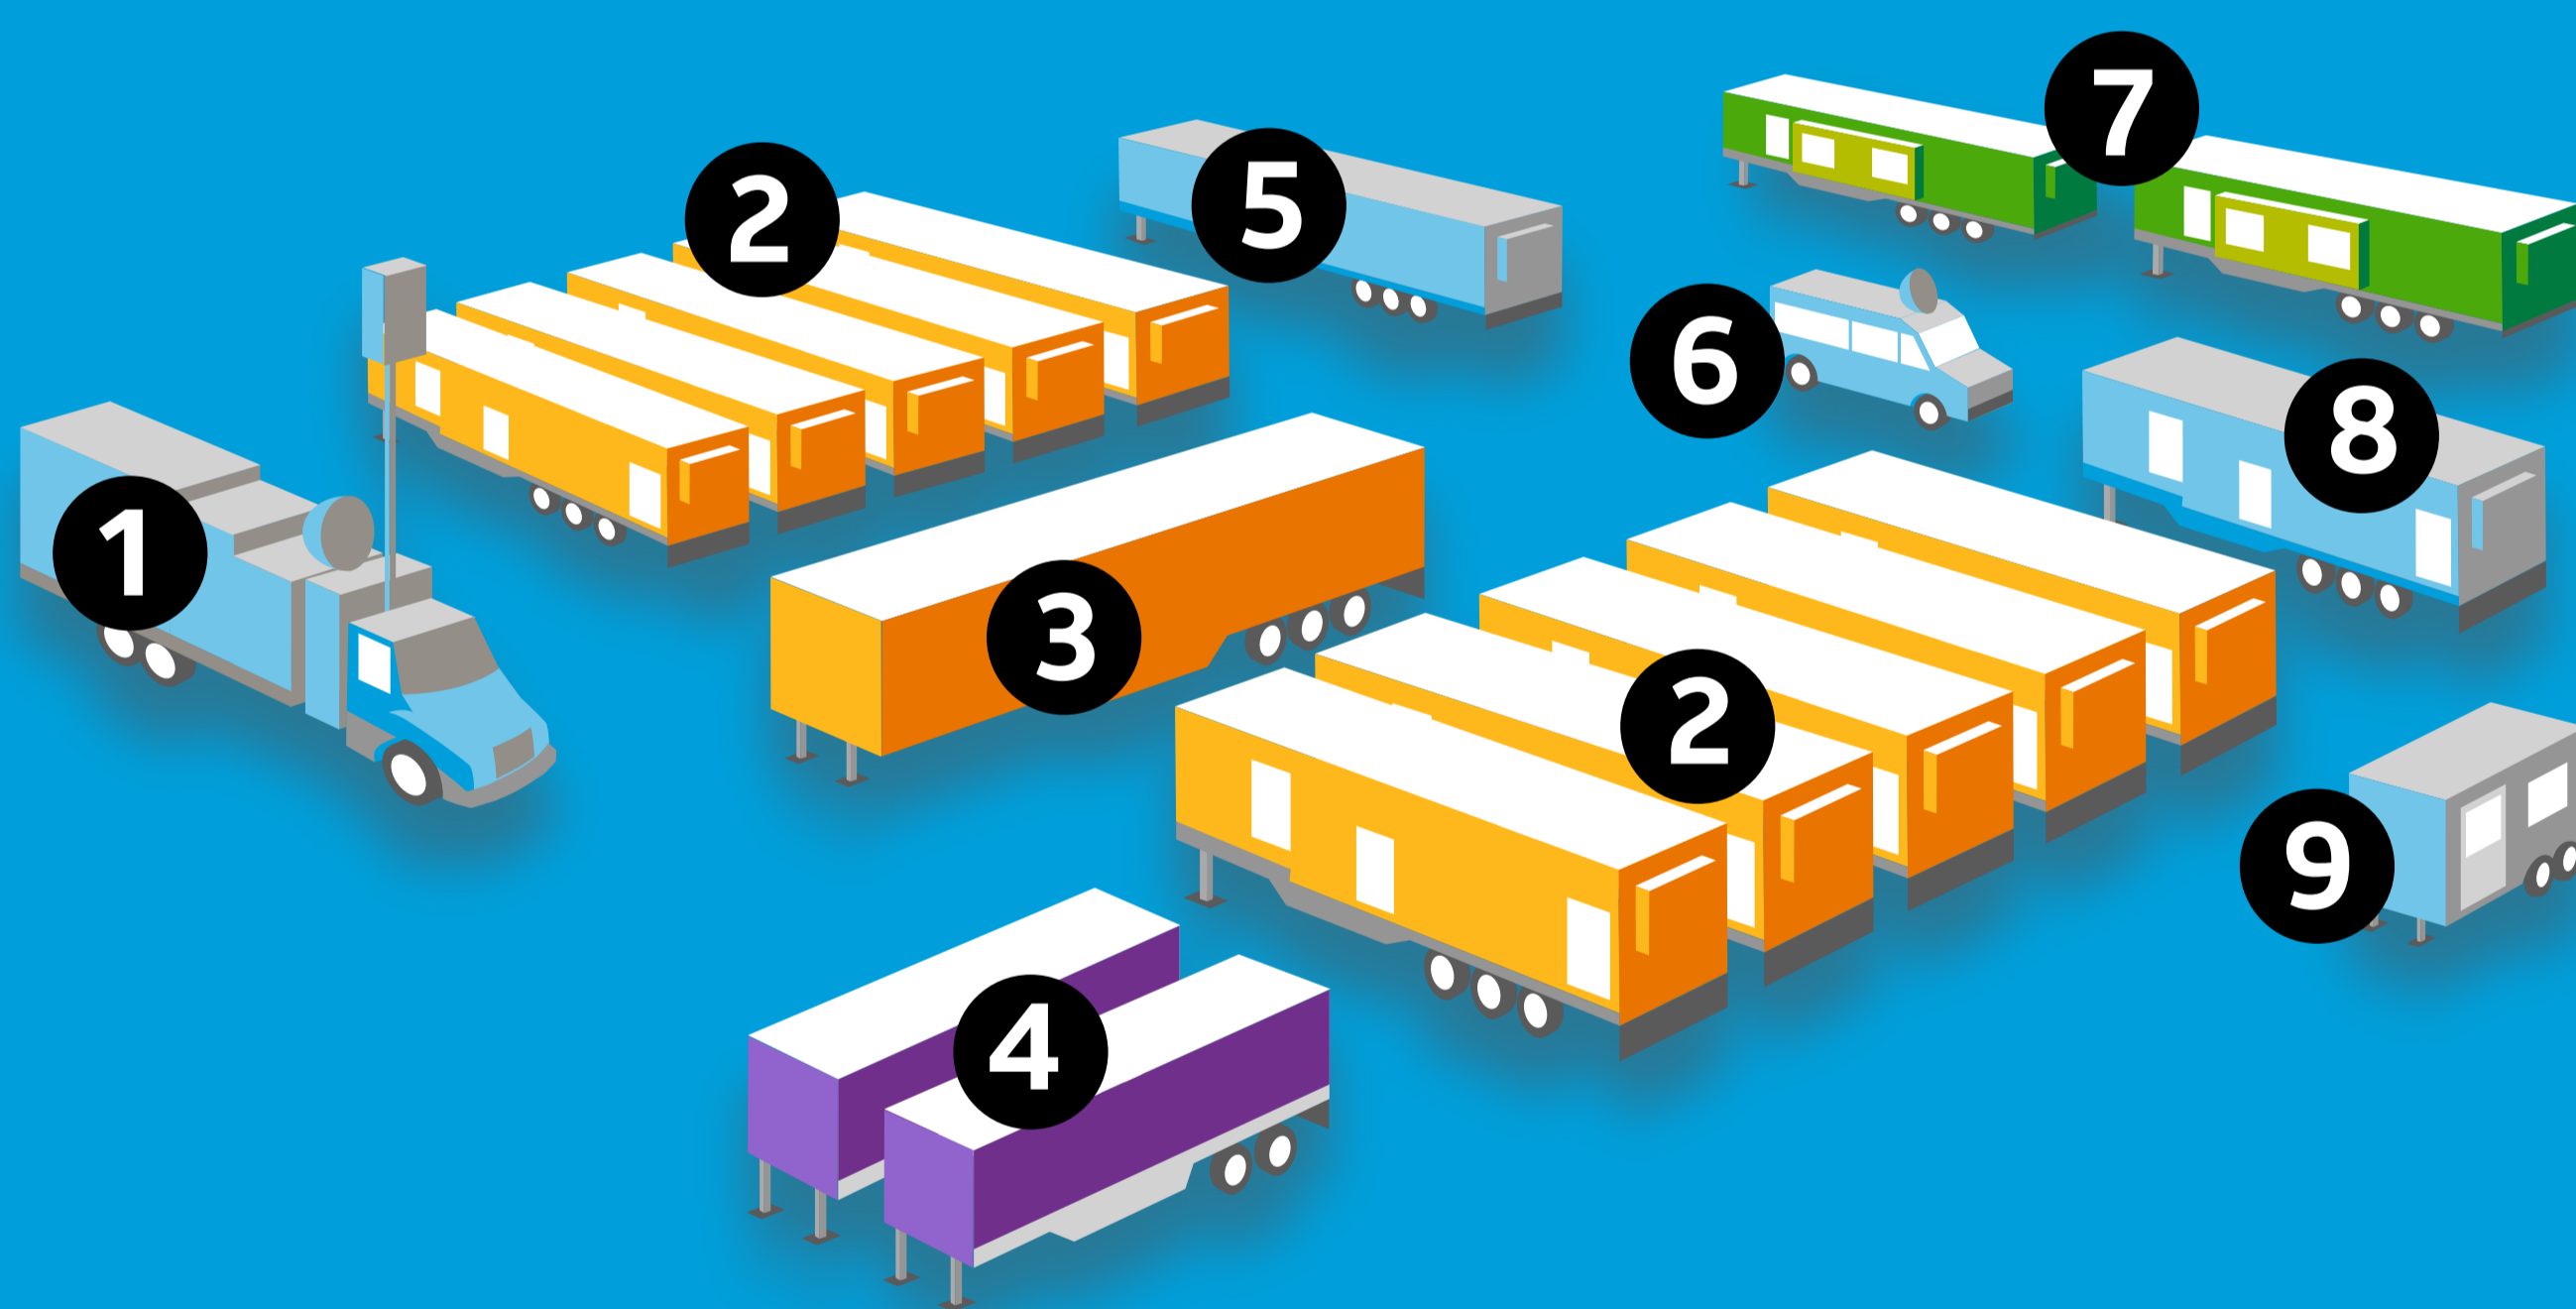

30 SATELLITE COLTS* & ECVS* 

150K WORKING HOURS DEVOTED TO RECOVERY EXERCISES

 **150+** RECOVERY TEAM MEMBERS

 **650M+** INVESTMENT

THE SET-UP:

1 **Satellite Cell on Light Truck (*COLT)**

Provides 2G,3G and 4G service where normal cell service is unavailable

2 **Technology Trailer**

Contains the same type of telecommunications equipment found in a brick-and-mortar network office.

3 **Power Distribution Trailer**

Acts as a sub-station for the recovery site--distributing commercial or generated power to the recovery and support trailers on a recovery site

4 **Hazardous Material Response**

Houses protective hazmats suits, hazardous material meters and breathing apparatus

5 **600kW Generator**

Large portable power generator

6 **Emergency Communications Vehicle (*ECV)**

Provides satellite-based VoIP, Ethernet and Wi-Fi service

7 **Command Trailer**

Provides a central command location for the recovery site and allows communications to the GNOC

8 **Hardware and Machine Shop**

Carries the hardware and tools for the team to be self-sufficient in disaster-impacted areas

9 **Security/ Medical Trailer**

Controls access to the recovery site

THE RESULT:

Rapid restoration of communications for consumers, businesses and public officials in the affected area
